PROFILE SUMMARY

Motivated Bachelor of Computer Science (Software Engineering) student with Honours from UMPSA, actively seeking an internship in Artificial Intelligence and Deep Learning. Passionate about LLMs, Agentic AI, and Computer Vision. Demonstrated ability to build practical AI applications using modern frameworks like LangChain, Hugging Face, and PyTorch. Committed to continuous learning and ready to contribute to innovative software solutions.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours Oct 2022 – Sep 2026
Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA), Pahang
Current CGPA: 3.72
Expected Graduation: 2026

TECHNICAL SKILLS

AI & ML: Pytorch, Scikit Learn, Hugging Face, LangChain, MCP
Languages: Python, TypeScript, Java, Dart, C#
Web & Mobile: Next.js, Laravel, Flutter, FastAPI
DevOps & Tools: Git, Docker, Linux

KEY PROJECTS

Deepfake Image Detection & Deployment - Final Year Project Apr 2025 – Dec 2025

- Developed a deep learning model specifically designed to identify synthetic/deepfake imagery.
- Performed LoRA fine-tuning on pre-trained Vision Transformers (ViTs) and Convolutional Neural Networks (CNNs) to improve detection accuracy.
- Containerized the application using Docker and deployed the model on a server to serve real-time inference requests.

Real-Time Web Search Chatbot - Personal Project July 2025

- Engineered an AI chatbot capable of retrieving real-time information from the web to answer user queries, overcoming the knowledge cutoff of standard LLMs.
- Utilized LangChain to orchestrate the interaction between the LLM and search engines.
- Optimized response latency and relevance for a seamless user experience.

Yahoo Finance MCP Server - Personal Project Aug 2025

- Built a server implementing the MCP to standardize context exchange between AI models and applications.
- Integrated the Yahoo Finance API, allowing LLMs to trigger tools to retrieve and analyze live stock market data autonomously.
- Demonstrated proficiency in the emerging field of Agentic AI and tool-use capabilities.

LANGUAGES

English (Fluent), Malay(Fluent), Mandarin (Fluent), Japanese (Basic)
